(54) VENOUS PATTERN AUTHENTICATING DEVICE USING CONTACTLESS IC CARD

(57)Abstract:

PROBLEM TO BE SOLVED: To input the registration number of a venous pattern from a contactless IC card without using a keyboard by adding a contactless IC card reader to a venous pattern authenticating device.

SOLUTION: The venous pattern authenticating device using the contactless IC card inputs the registration number of the venous pattern by using the IC card and stores venous pattern data on the contactless IC card, so that an off-line system can be structured without using any host computer.
